## EDUCATION

### University Of Waterloo

*Bachelor of Environmental Studies in Geomatics, Honors Co-op*

Waterloo, ON

*Sept. 2020 – May 2025*

## EXPERIENCE

### Recruitment File Management Clerk (Full-time, In person)

Feb 2026 – Current

*The Department of National Defence*

*Barrie, ON*

- Spearheaded the development and implementation of a streamlined travel reimbursement process and data management system, improving operational efficiency within the detachment.
- Ensured the quality and accuracy of 100+ applicant files weekly, conducting thorough validation at each stage of the application process
- Upheld strict confidentiality protocols in the management of sensitive applicant data, ensuring compliance with privacy regulations and organizational security standards.

### Data & Analytics Technician (Co-op)

Jan 2024 – Dec 2024

*The Regional Municipality of York / Economic and Development Services*

*Newmarket, ON*

- Classified and visualized York Region's Yellow Belt by cross-referencing municipal zoning bylaw data in ArcGIS Pro to support affordable housing initiatives.
- Identified over 100+ provincially owned sites suitable for affordable housing through weighted multi-criteria analysis and supervised machine learning.
- Co-led the development of an interactive resource hub using Esri's Experience Builder to help users navigate urban development tools.
- Automated recurring workflows in FME, reducing manual data update times and improving data accuracy for public geospatial data.
- Streamlined processing of 300+ development applications (reading, comprehending, and drawing boundaries of site plans), ensuring compliance and management of workflow documentation.

### GIS Analyst (Co-op)

May 2023 – Aug 2023

*The Regional Municipality of York / Data Analytics and Visualization*

*Newmarket, ON*

- Processed LiDAR data to develop a tool that enables York Region residents to visualize potential rooftop solar energy generation for over 300,000+ buildings.
- Pushed edits and created the 2023 York Street Atlas using ArcMap, enhancing navigation and urban planning resources.
- Validated and corrected 400+ address points for York Region's Next Generation 911 initiative, strengthening emergency response accuracy.

### Monitoring and Data Services Strategist Support Officer (Co-op)

Sept 2022 – Dec 2022

*Environmental Climate Change Canada*

*Toronto, ON*

- Led Pacific Needs Index analysis at ECCC to identify optimal locations for additional moored buoys using spatial data to enhance marine weather data accuracy.
- Produced monthly maps illustrating the status and location of marine moored buoys to support monitoring and analysis efforts.

## PROJECTS

### Research Paper - Arctic Sea Ice Variation and Trends in the Northwest Passage

May 2025

*University of Waterloo*

- Using multi-criteria analysis and a diverse amalgamation of high-resolution satellite imagery, provided comprehensive overviews of short-term variations in sea ice behaviour.
- Utilized Excel, Google Earth Engine, and ArcGIS Pro to analyze and visualize sea routes based on sea ice albedo, concentration, and thickness.
- Calculated broadband surface albedo using optical imagery and custom in-house JavaScript code.
- Delivered insights relevant to shipping route feasibility and climate risk management.

## TECHNICAL SKILLS

---

**GIS & Visualization:** ArcGIS Pro, ArcMap, ArcGIS Online, QGIS, Experience Builder, Tableau, Power BI

**Programming:** Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS, R, React

**Data Processing & Automation:** FME, Python, SQL (Postgres), Excel

**Core Competencies:** Spatial analysis, geodatabase management, cartography, version control, metadata documentation
